

# netsign<sup>TV</sup> INSTALLATION GUIDE

## IMPORTANT CONNECTION STEPS

**STEP 1 : TURN ON THE MONITOR**

**STEP 2 : CONNECT THE ETHERNET CABLE**

**STEP 3 : CONNECT THE HDMI CABLE**

**STEP 4 : PLUG IN THE POWER CORD**

## NOTE

The video player will automatically start when powered on because it has been configured before the installation.

The Ethernet connection should be functional before the installation and should be compliant with preset configuration. If you connect a laptop computer and have access to Internet, your connection is operational.

## TERMS OF SALE

### Intel video player

To make sure the warranty is valid: the video player must be installed with a surge protector. The video player must be installed in a secure and well ventilated place to avoid overheating, vibrations and liquid infiltrations.

### Television

To make sure the manufacturers honor their warranty, television sets must be installed in a secure and well ventilated place to avoid overheating, vibrations and liquid infiltrations. The warranty becomes invalid if a non commercial model is used in a commercial application.
